Business Continuity for Auditors

Purpose: To understand the requirements of Clause 8 of ISO 22301:2019 in order to demonstrate competence as an auditor.

Audience: Intended for management system and internal auditors who would like to add the BCMS competency to their existing auditing competencies.

Description: Business Continuity for Auditors is designed to expose auditors who already competent in the audit of management systems to the requirements of Clause 8 of ISO 22301:2019. The course content mirrors ICOR's BCM 5000: ISO 22301 Lead Auditor course without the content on ISO 19011 on Auditing Practices, how to conduct an audit, how to lead an audit, and how to write an audit report.

Delivery Structure & Takeaways: The course is constructed around a case study and each activity is applied to the case study as we move through the course. With practical auditing activities as well as multi-media the participants gain an understanding of the requirements of ISO 22301 and how to audit to those requirements..

5 Lessons / Competency Areas
